Profile

A dedicated and motivated individual with passion for web development, I am always eager to apply my skills and knowledge to create innovative and user-oriented web solutions. With strong foundation in technologies such as HTML/CSS and JavaScript(React), I am always eager to staying up-to-date with latest web development technologies and techniques. I have completed several personal and public projects including building a fully functional pastry delivery website. I am adept at problem solving and enjoy working collaboratively to achieve project targets.

Work Experience

Volunteer Dec, 2022 - May, 2023
Tishe's Place, Ilorin(Remote).

- Revamped company's outdated website and improve its functionality collaborating closely with a team of volunteers, including designers and content creators, to create a visually appealing and user-friendly website also incorporated features such as interactive maps and online payment functionality.
- Built a user-friendly registration form with validation and integrated it with a functionality to store the information securely.

Project

Music Streaming App 2023

- Built an innovative music web app, delivering a seamless and immersive user experience.
- Implemented responsive design techniques, ensuring optimal performance and compatibility across various devices and screen sizes.
- Developed interactive features such as adding songs to favorite folder, categorising artistes and songs to enhance user engagement.

Real Estate Website 2023

- Built a dynamic and visually appealing real estate web application from concept to completion.
- Developed and maintained reusable code components and libraries, optimizing development efficiency.
- Implemented property filters and sorting functionalities giving users a seamless interactivity.
- Conducted thorough testing and debugging to identify and resolve any frontend issue ensuring high performance.
