Professional Summary

Web Developer with 3+ years of experience building and scaling responsive web applications using React, TypeScript, Node.js, NextJs, and Tailwind CSS. Proven ability to ship features that improve performance, usability, and business outcomes. Skilled at turning UX designs into reusable components, reducing development time, and collaborating with cross-functional teams to deliver impactful solutions. Strong record of contributing to both production-grade apps and open-source projects, with a focus on clean, maintainable, and scalable code.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** React, NextJS, Tailwind CSS, Redux, Context API, Chakra UI
- **Backend:** Node.js, Express.js, RESTful APIs, Supabase
- **Database:** MongoDB, Prisma
- **Tools & Workflow:** Git, Vite, VS Code, Netlify, Vercel

Relevant Experience

Freelance - Task Management Dashboard(Desktop View)

Sept 2025

- Built a Task Management Dashboard UI with NextJS, enabling users create, assign, and track tasks with 100% type safety using TypeScript.
- Designed an interactive UI with Chakra UI, featuring multiple view layouts, animated modal, and clean task table structure.
- Implemented nested date tracking (createdAt, completedAt), automatically updating completion timestamps for accurate reporting.

Freelance — QuikMeds

Sept 2024 – Dec 2024

- Built 15+ modular React components with Tailwind, cutting development time for new features by 30% and improving consistency across the UI.
- Reviewed and merged 10+ pull requests, ensuring consistent coding standards and reducing integration bugs by 20%.
- Actively engaged in community discussions, improving contributor retention and collaboration.

Freelance Web Developer — Tishe's Place

Feb 2024 – May 2024

- Rebuilt company website with React + Tailwind, cutting average load time from 4.5s to 1.8s and improving mobile usability.
- Designed and implemented secure customer registration forms, reducing incomplete signups by 30%.
- Delivered project within deadlines, supporting small business digital presence.

Education

B.Sc. Mathematics — Olabisi Onabanjo University, 2020

Independent Projects(Ongoing, 2023-2026)

Reward System

- Built a full *Reward System* with React and Supabase, recreating a production UI with daily streaks, points accrual, locked/unlocked rewards, and real-time profile updates.
- Designed secure backend logic using Supabase RPCs and RLS, ensuring all reward unlocking, streak validation, and point updates are server-controlled and tamper-proof.
- Implemented clean frontend architecture with custom hooks and contexts, handling auth, profile state, loading/error states, and seamless UI updates without page refreshes.

Bookmark Manager

- Built a responsive *Bookmark Manager*r with search, sorting, metadata auto-fetching, and multi-tag filtering, using React, TypeScript, and Next.js.
- Designed an interactive UI with Chakra UI + Framer Motion, featuring hover previews, animated sorting, and clean bookmark card layouts.
- Implemented efficient state management and performance optimizations, including context-based state, debounced search, and reliable metadata parsing.

E-commerce App

- Built and deployed a full-stack *E-Commerce Web App* using React, Redux, TypeScript, Tailwind CSS, Node.js, Express, and MongoDB.
- Implemented user authentication, shopping cart with Redux state management, secure checkout via Stripe, and an admin dashboard for product management.

MindPad

- *Notes App* with folder organization, live search, and color customization (React, TypeScript, Tailwind CSS).
- Designed for seamless note management and tested with 50+ entries for performance.
